Break-Even Analysis

Break-Even Point (units) = Fixed Costs ÷ (Selling Price per Unit - Variable Cost per Unit)

Example: If your fixed costs are ₹5,00,000/month, selling price is ₹500/unit, and variable cost is ₹300/unit:
Break-Even = 5,00,000 ÷ (500 - 300) = 2,500 units/month

Use this to set realistic sales targets and pricing strategies.
